Profile

Junior full-stack developer holding a bachelor’s degree in computer science, application development track (HELHa). During my internship at Indigo Studio, I designed and shipped LeadBoy to production, an AI agent for used-vehicle sourcing. I build complete web and mobile applications (TypeScript, React, Next.js, Node.js, Java, Spring Boot, PostgreSQL) and use generative AI, including Claude Code, within a rigorous workflow: automated tests, code review and security.

Technical skills

Languages: TypeScript, JavaScript, Java, C# (.NET), Python, PHP, SQL, C++, Dart, HTML, CSS
Front end: React, Next.js, Angular, Tailwind CSS, React Native (Expo), Flutter, JavaFX
Back end and APIs: Node.js, Express, Spring Boot (Spring Security, Spring AI), ASP.NET Core, REST APIs, WebSocket, OpenAPI (Swagger)
Databases and ORMs: PostgreSQL, MySQL, SQL Server, SQLite, Supabase (Row Level Security), JPA, Hibernate, Entity Framework Core, Prisma, Drizzle
Security: JWT, OAuth 2.0, bcrypt, Zod validation, RBAC, CORS, rate limiting, prepared statements
DevOps and tools: Docker, Docker Compose, Git, GitHub, Linux (VPS), Traefik, Nginx, Vercel, Maven, CMake
Testing: Vitest, Jest, Playwright, JUnit 5, Mockito, Testing Library, Testcontainers
Artificial intelligence: Claude API, Claude Code, Gemini API, multimodal LLMs (vision), RAG (LlamaIndex), AI agents, prompt engineering
Architecture and methods: MVC, layered architecture, clean architecture, CQRS, design patterns (Command, State, Strategy, Flyweight), Agile (Scrum), UML

Professional experience

Full-Stack Developer Intern | Indigo Studio February 2026 – May 2026

- Designed and shipped LeadBoy to production (final-year project): an AI agent that extracts AutoScout24 listings (Playwright), contacts sellers on WhatsApp and negotiates prices (Claude, LlamaIndex RAG). Stack: Next.js, TypeScript, Node.js, Supabase, PostgreSQL.
- Secured an API of around forty endpoints: JWT authentication, Zod validation, rate limiting, API key protection, Vitest unit tests.
- Deployed the application and its WhatsApp server (Node.js, Express) with Docker Compose on a hardened Linux VPS behind Traefik and Let’s Encrypt; added FR, EN and NL internationalisation.
- Built internal tools: Tetris Formation, a real-time multiplayer quiz game (Next.js, Prisma, PostgreSQL, Pusher), and Plan Financier, a financial-plan calculator (SQLite, Drizzle, Jest).
- Embedded Claude Code in the daily workflow: codebase exploration, refactoring, test writing and documentation, with systematic review of generated code.

Crew Member (student job) | McDonald’s, La Louvière August 2024 – present

- Customer service and order preparation at a high pace, as a team and in strict compliance with hygiene and quality standards.

Projects

Smaatch: web and mobile platform to run sports clubs: members, attendance, finances, ticketing. Next.js, React Native (Expo), Supabase, multi-tenant PostgreSQL with Row Level Security, around 90 test files.
Job Tracker: job application tracker with an AI match score between the resume and the job ad. Java 21, Spring Boot, Spring Security (JWT), JPA, Hibernate, Spring AI (Gemini), Next.js, Docker.
The Lost Grimoire: Markdown note-taking app built in a five-day hackathon by a team of six; lead front-end developer. React, Spring Boot, CQRS, MySQL, Docker.
ClinikTime: medical appointment booking platform with patient, doctor and admin areas. Angular, ASP.NET Core, Entity Framework Core, SQL Server, JWT.

Education

Bachelor in Computer Science, Application Development track | HELHa, Mons, Belgium 2023 – 2026

Languages

French: native | English: B2 (professional working proficiency)

Strengths

Teamwork, problem solving, organisation and time management, communication.
